Subject: Wanted: mod for DJ-180T
To: ham-equip@ucsd.edu

Hi all,

I just picked up an Alinco DJ-180T (2m), and I'm looking for the mod to open
it up for out-of-band operation. I have checked the mod archive at

garfield.catt.ncsu.edu (the most complete of those I've seen), and one or two others, but haven't found it.

Given that the mod to the 580 consists mainly of cutting the "large looped red wire", I thought that the 180 might be similar, but I'd rather not attempt it without a little more info.

I bought the 180 because it was pretty affordable and expandable, and this new ham has set the HF budget higher than the VHF budget. :-)

Any pointers would be greatly appreciated.
